Art Unit: 1742

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Jeffrey Killian on June 10, 2005.

2. In the claims:

Claim 10, line 6, change "compound" to --layer--.

Claim 14, line 3, delete "or combinations thereof".

3. The following is an examiner's statement of reasons for allowance:

a) Claims 10, 13-25, and 37 are allowable for reasons as set forth in the Office Action mailed March 11, 2005.

b) Claims 6-9, 12, and 26-36 are allowable because the prior art does not disclose or suggest applying a Ca-containing layer having a calcium content as presently claimed upon an FeCrAl alloy of a composition as presently claimed and heat treating. With regard to the prior art, the SUS 430 treated in JP 218429 has an aluminum content far below the minimum presently claimed. In the numerous examples disclosed in Shibata '639, the treating compositions either contain no calcium, or contain calcium in amounts far greater than the maximum permitted by the present claims, i.e. nothing in the Shibata disclosure would lead one of skill in the art to the species as defined in the instant claims.
